

Insect Panel Door Curtain Commercial

Features

Consists of a series of weighted mesh panels hung from a track above the door. Fits inside or outside. If your door opens out the screen will be fitted on the inside and vice versa.

Panels made from heavy duty mesh suitable for commercial premises. Available in a variety of options to suit your circumstances; Made-to-measure (supplied ready for you to fit) or DIY Kit (for you to make and fit), reveal or face fit options, 3 part PVC track or stainless steel hook system. Screw fixed.

Benefits

Simple cost effective way of screening doorways, at home and in commercial premises.

Panels are easily parted to provide access through the doorway. Panels weighted at the bottom to reduce movement in the wind. Easily removed for cleaning or storage.

The stainless steel hook system track, allows you to use either commercial mesh panels with metal headings, or PVC strip panels (see below). Suitable for screening fire doors.

Measuring

Measure the width of the aperture plus any bevelled edges on the frame. Add at least 25mm of flat surface on each side to allow for an overlap with the doorway. If fitting to wall outside the reveal, allow a wider overlap; 50mm or more each side is suitable.

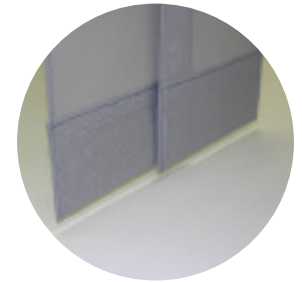

Measure the height from the top of the door frame to the threshold or floor and deduct 10mm to allow for clearance.

Made-to-measure - we will make to the exact size you tell us.

DIY Kit – order the next larger size kit.

Width: Aperture (and bevelled edges) + 50mm or more of flat surface = ____ mm

Height: Top of door frame to floor or threshold - 10mm = ____ mm

3 part PVC Track

Face Fit

Reveal Fit

Face Fit

		Max Width mm	Max Height mm				
For use in commercial premises	DIY KIT or Made-to-measure, 3 part PVC track	950, 1100, 1250, 1400	2400	Face or Reveal Fit	White or Brown track	Grey or Black Commercial mesh panels	Screw fix
	DIY KIT or Made-to-measure, stainless steel system	950, 1100, 1230, 1400, 1600, 1750, 1900	2400	Face or Reveal Fit	Stainless Steel hook system	Grey or Black Commercial mesh panels	Screw fix

PVC Strip Curtain

Features

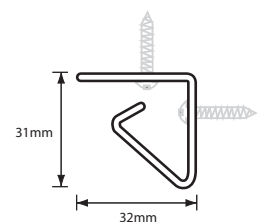

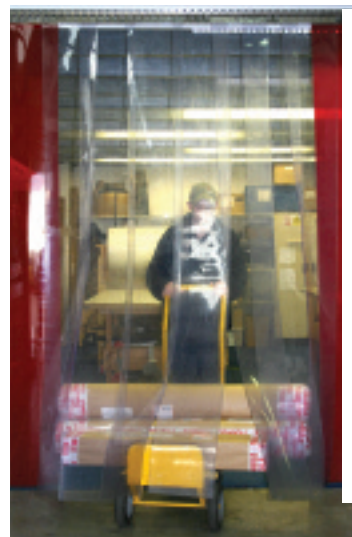

Clear PVC panels hook onto a high quality, food safe stainless steel rail. The panels provide a tough and flexible barrier against insects, birds and other vermin. They are available to suit pedestrian, pallet and forklift entry, and come in a choice of standard or polar grade PVC. Made-to-measure (supplied ready for you to fit).

Benefits

Simple to install, the panels are hung individually, allowing the overlap to be adjusted. Panels are easily removed and replaced for cleaning. Panels are interchangeable with commercial mesh panels with metal headings (see above).

Measuring

Follow instructions for the Insect Panel Curtain - above.
