

### Features

- **Standard Insect Mesh** is made from woven fibreglass yarn, coated in PVC. It is available in a range of gauges from standard 18x16 to close weave 20x30 gauge.
- **Commercial Insect Mesh** is made from woven polyester yarn, coated in PVC. It is thicker and tougher than standard mesh and is available in 17x14 gauge.
- **Aluminium & Stainless Steel** mesh are also available.
- Insect Mesh is available in either Grey or Black.
- Standard roll width is 1.2m. Fibreglass is also available in 1.8m wide rolls.
- Mesh can be bought by the metre, subject to a minimum quantity, or by the whole roll (see price list for details).

### Benefits

- Insect Mesh allows natural ventilation and provides effective protection from flying insects.
- In door and window screens Insect Mesh is unobtrusive – allowing light and fresh air into a room with minimal obstruction to the view.
- Insect Mesh is lightweight, flexible, can be cut with a knife or scissors and is easy to work with.
- Easy to keep clean with occasional use of mild soap and water.
- Insect Mesh is non-combustible and will not rust, corrode or discolour.

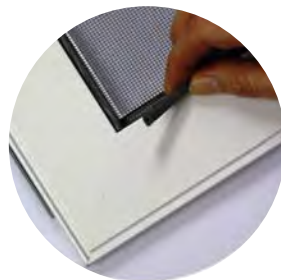

Standard roll width 1.2m

### Fixing Method - Doors and Window Screens

In manufactured screens mesh is held in place with spline (rubber string) pushed in to a spline groove in the screen profile.

For DIY screening solutions the mesh can be fixed with staples, battening or a bead of silicone.

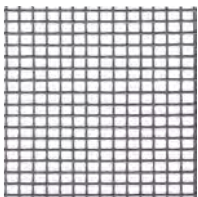

Spline fits into the spline groove to hold mesh firmly in place

Insect mesh keeps flying insects out without obstructing the view

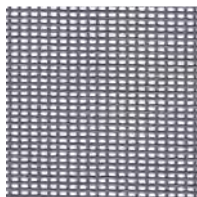

### Mesh Samples

The swatches below are to scale

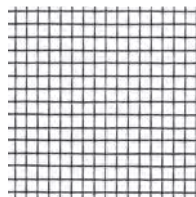

**Fibreglass**

18x16 gauge  
Woven Fibreglass, PVC coated  
Colour: Grey or Black  
Roll widths: 1.2m or 1.8m  
Openess factor 59%  
Light reduction of 41%

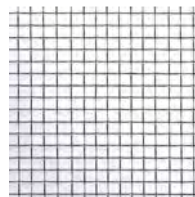

**Midge / Solar Mesh**

20x30 gauge  
Woven Fibreglass, PVC coated  
Colour: Grey or Black  
Roll widths: 1.2m or 1.8m  
Openess factor 30%  
Light reduction of 70%

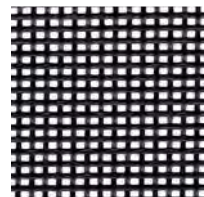

**Aluminium**

18x16 gauge  
Woven Aluminium, with Electrodeposition coating  
Colour: Black  
Roll width: 1.2m  
Openess factor 68%  
Light reduction of 32%

**Stainless Steel**

16x16 gauge  
Woven Stainless Steel  
Type 304  
Colour: Silver  
Roll width: 1.2m  
Openess factor 73%  
Light reduction of 27%

**Polyester**

17x14 gauge  
Woven Polyester, PVC coated  
Colour: Grey or Black  
Roll width: 1.2m  
Openess factor 25%  
Light reduction of 75%
